1 [Document reuse and semantics: A dynamic user interface for document assembly](#)

Miro Lehtonen, Renaud Petit, Oskari Heinonen, Greger Lindén

November 2002 **Proceedings of the 2002 ACM symposium on Document engineering**

Full text available:  pdf(271.56 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Document assembly has turned out to be a convenient approach to corporate publishing and reuse of large collections of documents. Automated assembly of a document reduces the amount of human effort when creating customized documents consisting of document fragments from a collection. However, most methods used require a number of parameters to be defined prior to the assembly process, and providing these parameters in the correct format is seen to be too demanding for an average user. We have des ...

**Keywords:** BML, XML, XSLT, document assembly, dynamic user interfaces, structured documents

2 [An issue-oriented approach to judicial document assembly](#)

L. Karl Branting

August 1993 **Proceedings of the fourth international conference on Artificial intelligence and law**

Full text available:  pdf(749.95 KB) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

3 [Knowing documents](#)

Marc Lauritsen

August 1993 **Proceedings of the fourth international conference on Artificial intelligence and law**

Full text available:  pdf(757.36 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Drawing upon scholarship on legal drafting, current document assembly technology, and aspects of the Standard Generalized Markup Language, this article discusses the forms of knowledge at play in the creation of legal documents. It also examines the notion of self-describing documents and their potential role in new modes of expressing and delivering knowledge pertinent to legal drafting.

4 [Market realities of rule-based software for lawyers: where the rubber meets the road](#)

R. W. Morrison

May 1989 **Proceedings of the second international conference on Artificial intelligence and law**

Full text available:  pdf(448.41 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Part One of this paper briefly describes existing rule-based software for lawyers. Part Two turns to the difficulties that have beset lawyers willing to consider use of these programs. Part Three argues that the difficulties will be surmounted gradually because of competition between firms and leads to the final part that considers how the legal market is accepting rule-based software.

5 **Integrating discourse and domain knowledge for document drafting**

L. Karl Branting, Charles B. Callaway, Bradford W. Mott, James C. Lester

June 1999 **Proceedings of the seventh international conference on Artificial intelligence and law**

Full text available:  pdf(1.06 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Document drafting is a key component of legal expertise. Effective legal document drafting requires knowledge both of legal domain knowledge and of the structure of legal discourse. Automating the task of legal document drafting therefore requires explicit representation of both these types of knowledge. This paper proposes an architecture that integrates these two disparate knowledge sources in a modular architecture under which representation and control are optimized for each task. This ...

6 **Interactive effectivity control: design and applications**

Richard Ilson

January 2000 **Proceedings of the ACM conference on Document processing systems**

8 **System documentation as software**

Geoffrey James Sickler

January 1982 **Proceedings of the 1st annual international conference on Systems documentation**

Full text available:  pdf(311.39 KB)

Additional Information: [full citation](#), [abstract](#), [index terms](#)

Accuracy, Timeliness, Flexibility, and Low Cost—computer buyers want BETTER documentation, they want it NOW, they want it to suit THEIR NEEDS, and they want it CHEAP. Unfortunately, current documentation methods have failed to satisfy these needs. The inadequacies of the traditional technical manual are well known to anyone who has tried to use one, regardless of the herculean effort it probably took to collect and publish the damn thing. Typically, the resources that could ...

9 **A constraint-driven system for contract assembly**

Aspassia Daskalopulu, Marek Sergot

May 1995 **Proceedings of the fifth international conference on Artificial intelligence**

## and law

Full text available:  [pdf\(927.57 KB\)](#) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

### 10 IT in legal practice: research in progress

Leo van der Wees, Marleen Huysman

April 1994 **Proceedings of the 1994 computer personnel research conference on Reinventing IS : managing information technology in changing organizations: managing information technology in changing organizations**

Full text available:  [pdf\(316.04 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#), [review](#)

Information technology (IT) offers possibilities for legal practitioners not only as an aid in administrative processes but also for legal tasks. The former have been gradually automated particularly in larger firms but automation regarding the latter is still uncommon. Nevertheless, law firms could take advantage of their late start. A research project initiated by the Centre for Computers and Law of the Erasmus University Rotterdam will examine the application of IT to law firms ...

### 11 Document Databases: Requirements for XML document database systems

Airi Salminen, Frank Wm. Tompa

November 2001 **Proceedings of the 2001 ACM Symposium on Document engineering**

Full text available:  [pdf\(141.89 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

The shift from SGML to XML has created new demands for managing structured documents. Many XML documents will be transient representations for the purpose of data exchange between different types of applications, but there will also be a need for effective means to manage persistent XML data as a database. In this paper we explore requirements for an XML database management system. The purpose of the paper is not to suggest a single type of system covering all necessary features. Instead the pur ...

**Keywords:** XML, XML database systems, data definition, data manipulation, data modelling, structured documents

### 12 Automated drafting of self-explaining documents

L. Karl Branting, James C. Lester, Charles B. Callaway

Vijay Mital, Agathoclis Stylianou, Les Johnson

May 1991 **Proceedings of the third international conference on Artificial intelligence and law**

Full text available:  pdf(880.06 KB) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

16 Document formatting: Creating personalized documents: an optimization approach

Lisa Purvis, Steven Harrington, Barry O'Sullivan, Eugene C. Freuder

November 2003 **Proceedings of the 2003 ACM symposium on Document engineering**

Full text available:  pdf(432.32 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The digital networked world is enabling and requiring a new emphasis on personalized document creation. The new, more dynamic digital environment demands tools that can reproduce both the contents and the layout automatically, tailored to personal needs and transformed for the presentation device, and can enable novices to easily create such documents. In order to achieve such automated document assembly and transformation, we have formalized custom document creation as a multiobjective optimization ...

**Keywords:** automated layout, constrained optimization, constraint-based reasoning, document design, genetic algorithm, multiobjective optimization

17 "Boyd V. Deaver - Litigation Strategies" videodisc: an opportunity to improve curriculum and prototype expert systems

D. Burnstein

May 1989 **Proceedings of the second international conference on Artificial intelligence and law**

Full text available:  pdf(746.06 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Once in a rare while we come across an environment that can illuminate several areas of inquiry. BOYD V. DEAVER: LITIGATION STRATEGIES is such a tool. The major original thesis of the paper is that using AI tools to gather the "audit trails" of case development strategies of experienced attorneys, and bringing them to the attention of law school professors would assist in curriculum assessment and development. The second aspect of the paper is a brief proposal to deve ...

18 Software and document engineering: Document engineering for e-business

Robert J. Glushko, Tim McGrath

November 2002 **Proceedings of the 2002 ACM symposium on Document engineering**

Full text available:  pdf(418.83 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

It can be said that "document exchange" is the "mother of all patterns" for business (and for e-business). Yet, by itself this view isn't sufficiently prescriptive. In this paper, we present additional perspectives or frameworks that make this abstraction more rigorous and useful. We describe an approach to artifact-driven analysis, model refinement, and implementation for document-intensive systems that unifies the "document analysis" approach from publishing and the "data analysis" approach fr ...

**Keywords:** XML, business process modeling, document analysis, document engineering, e-Business, patterns, reuse

19 Advisory systems for pro se litigants

L. Karl Branting

May 2001 **Proceedings of the 8th international conference on Artificial intelligence and law**

Full text available:  pdf(189.29 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Increasing numbers of litigants represent themselves in court. Advisory systems designed to help litigants understand the available legal remedies and satisfy the substantive and procedural requirements to obtain those remedies have the potential to assist these litigants and thereby reduce the burden that they impose on the courts. This paper presents a four-component model of advisory systems for prose litigants. This model was implemented in the Protection Order Advisory (POA), an advisory ...

20 The other formalization of law: SGML modelling and tagging

Daniel Poulin, Guy Huard, Alain Lavoie

June 1997 **Proceedings of the sixth international conference on Artificial intelligence and law**

Full text available:  pdf(1.03 MB) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** SGML, information searching, intelligent law information systems, law information systems
